

# XML Docbook to Mediawiki Converter

**Author** : Maria Chiara Pievatolo

**Date** : 12 maggio 2013

A Perl script, based on the [work of Stefano Selleri](#), to migrate XML-Docbook 4.X documents to Wiki markup. I added some lines to meet my need to convert my [Kant translations](#) from Docbook to MediaWiki. A sample of the output can be seen [here](#).

The zipped script may be downloaded [here](#). To use it, type

```
perl convert.ploutput.txt
```

Check the result before publishing it.
